

# Customer Shopping Behavior Analysis

## 1. Project Overview

This project analyzes customer shopping behavior using transactional data from 3,900 purchases across various product categories. The goal is to uncover insights into spending patterns, customer segments, product preferences, and subscription behavior to guide strategic business decisions.

## 2. Dataset Summary

- Rows: 3,900
- Columns: 18
- Key Features:
  - Customer demographics (Age, Gender, Location, Subscription Status)
  - Purchase details (Item Purchased, Category, Purchase Amount, Season, Size, Color)
  - Shopping behavior (Discount Applied, Promo Code Used, Previous Purchases, Frequency of Purchases, Review Rating, Shipping Type)
  - Missing Data: 37 values in Review Rating column

## 3. Exploratory Data Analysis using Python

We began with data preparation and cleaning in Python:

- Data Loading: Imported the dataset using pandas.
- Initial Exploration: Used `df.info()` to check structure and `.describe()` for summary statistics

df.describe(include='all')														
	Customer ID	Age	Gender	Item Purchased	Category	Purchase Amount (USD)	Location	Size	Color	Season	Review Rating	Subscription Status	Shipping Type	Discount Applied

### ● Missing Data Handling:

Checked for null values and imputed missing values in the Review Rating column using the median rating of each product category.

### ● Column Standardization: Renamed columns to snake case for better readability and documentation.

### ● Feature Engineering:

- Created **age\_group** column by binning customer ages.
- Created **purchase\_frequency\_days** column from purchase data.

- Data Consistency Check:

Verified if **discount\_applied** and **promo\_code\_used** were redundant; dropped **promo\_code\_used**.

- Database Export: Exported the DataFrame as CSV file and loaded the cleaned DataFrame into the database for SQL analysis.

## 4. Data Analysis using SQL (Business Transactions)

We performed structured analysis in PostgreSQL to answer key business questions:

1. **Revenue by Gender** – Compared total revenue generated by male vs. female customers.

	gender	revenue
	text	bigint
1	Female	75191
2	Male	157890

2. **High-Spending Discount Users** – Identified customers who used discounts but still spent above the average purchase amount

	customer_id	purchase_amount
	[PK] integer	integer
1	2	64
2	3	73
3	4	90
4	7	85
5	9	97
6	12	68
7	13	72
8	16	81
9	20	90

Total rows: 839 | Query complete 00:00:00.322

**3. Top 5 Products by Rating** – Found products with the highest average review ratings

	item_purchased text	Average Review Rating numeric
1	Gloves	3.86
2	Sandals	3.84
3	Boots	3.82
4	Hat	3.80
5	Skirt	3.78

Total rows: 5    Query complete 00:00:00.268

**4. Shipping Type Comparison** – Compared average purchase amounts between Standard and Express shipping.

	shipping_type text	Average Purchase Amount numeric
1	Standard	58.46
2	Express	60.48

**5. Subscribers vs. Non-Subscribers** – Compared average spend and total revenue across subscription status.

	subscription_status text	total_customers bigint	avg_spend numeric	total_revenue numeric
1	Yes	1053	59.49	62645.00
2	No	2847	59.87	170436.00

**6. Discount-Dependent Products** – Identified 5 products with the highest percentage of discounted purchases.

	item_purchased text	discount_rate numeric
1	Hat	50.00
2	Sneakers	49.66
3	Coat	49.07
4	Sweater	48.17
5	Pants	47.37

**7. Customer Segmentation** – Classified customers into New, Returning, and Loyal segments based on purchase history.

	customer_segment text	total_customers bigint
1	Loyal	3116
2	New	83
3	Returning	701

**8. Top 3 Products per Category** – Listed the most purchased products within each category

	item_rank bigint	item_purchased text	category text	total_orders bigint
1	1	Jewelry	Accessori...	171
2	2	Sunglasses	Accessori...	161
3	3	Belt	Accessori...	161
4	1	Blouse	Clothing	171
5	2	Pants	Clothing	171
6	3	Shirt	Clothing	169
7	1	Sandals	Footwear	160
8	2	Shoes	Footwear	150
9	3	Sneakers	Footwear	145

**9. Repeat Buyers & Subscriptions** – Checked whether customers with >5 purchases are more likely to subscribe.

	subscription_status text	repeat_buyers bigint
1	No	2518
2	Yes	958

**10. Revenue by Age Group** – Calculated total revenue contribution of each age group.

	age_group text	total_revenue bigint
1	Young Adult	62143
2	Middle-aged	59197
3	Adult	55978
4	Senior	55763

## 5. Dashboard in Power BI

Finally, we built an interactive dashboard in Power BI to present insights visually

## 6. Business Recommendations

- Boost Subscriptions – Promote exclusive benefits for subscribers.
- Customer Loyalty Programs – Reward repeat buyers to move them into the “Loyal” segment.
- Review Discount Policy – Balance sales boosts with margin control.
- Product Positioning – Highlight top-rated and best-selling products in campaigns.
- Targeted Marketing – Focus efforts on high-revenue age groups and express-shipping users.
